

24/7 Server Task Automation Replication / Synchronization

Avanti's TaskMaster® Server Automation Solution for Novell NetWare® Servers

Completely automate most any NetWare Server Task with *1* NLM / Product, including scheduling, processing & logging. Extended commands include Replication / Synchronization.

The possibilities are endless. The results are immediate. Productive from day one. The ROI is only limited by use.

- Extended Console Commands & Enhanced Batch Processor / Scripting with variables (user & Server), IF / WHILE conditionals, SMTP support & more. No complicated programming skills required.
- Replicate files / Sync data between Servers, even across NDS trees, including all NetWare attributes, name spaces (even Mac & NFS), times & trustees.
- Schedule multiple, concurrent, interactive tasks. Schedule 1-to-1 / 1-to-Many / Many-to-1 replication.
- Simplify task automation: Combines features of CRON, Netbasic, PHP, Perl, RSYNC & Toobox all in *1* NLM.
